

As part of practical work of B.Ed. trainees, the school internship program is conducted in which the trainee takes the first and second teaching method hours they are required to take in which they have to complete the consecutive teaching process by taking five hours based on one component. A component test of 20 or 25 marks is taken based on the component covered or taught in its format i.e. constitution chart blue print.

### Meaning of Test

1. Most commonly used methods of making measurements in education
2. An instrument or systematic procedures for measuring sample of behavior by posing a set of questions in uniform manner
3. Designed to measure any quality, ability, skill or knowledge
4. There is always right/ best and wrong answer.

### Limits

1. Time limit.
2. Question limit.
3. Unit test code shall be fully isolated.
4. It does not depend on other.
5. Unit test code should be faster it should run quickly.

### Questions Types Wise Mark System

Objective question, Short questions and long questions. Objective questions - 7 Marks, Short Questions - 18 Marks. Total Marks 25.

### Sub-Unit wise mark system

Marathi method - Unit 1<sup>st</sup> : Daulta 8 Marks, Unit 2<sup>nd</sup> Ghr 6 Marks, Unit 3<sup>rd</sup> Damdi 11 Marks. Total marks 25.

### Objective wise mark system

Knowledge and understanding - 5+8 Marks, Skill 4 Marks, Application 8 Marks. Total 25 Marks.

Constituent table is prepared from this, it is the soul of the component test. Constituent table is very important in the component test. Questions have to be prepared according to this. The students of all these classes solve and score the component test in class itself and this helps the students to understand how well they have understood the material covered in the component.

### Blue Print

- Blue print is a document which give a complete functional picture and the test.
- 9<sup>th</sup> shows
  - distribution of questions
  - different objectives
  - various aspect of the content
- The blue print is 3D chart having content spread along the vertical axis and objectives to be tested on horizontal axis.

### Purpose of blue print

The purpose of constructing examination using a blue print is to provide a conceptual map of examination format and the content area separated in assessment.
